

Force and energy. A theory of dynamics (1888) by Grant Allen

Charles Grant Blairfindie Allen (February 24, 1848 – October 25, 1899) was a Canadian science writer and novelist, and a proponent of the theory of evolution. Allen was born near Kingston, Canada West (known as Ontario after Confederation) - the second son of Catharine Ann Grant and the Rev. Joseph Antisell Allen, a Protestant minister from Dublin, Ireland. His mother was a daughter of the fifth Baron of Longueuil. He was educated at home until, at age 13, he and his parents moved to the United States, then to France and finally to the United Kingdom. He was educated at King Edwards School in Birmingham and at Merton College in Oxford, both in the United Kingdom. After graduation, Allen studied in France, taught at Brighton College in 1870/71 and in his mid-twenties became a professor at Queens College, a black college in Jamaica.
