

Proceedings CD-ROM: 100th Anniversary Earthquake Conference Commemorating the 1906 San Francisco Earthquake

This Proceedings CD set contains papers and abstracts of presentations given at the April 18-22, 2006, conference in San Francisco, California, which was co-convened by the Earthquake Engineering Research Institute, the Seismological Society of America (SSA), and the California Governor's Office of Emergency Services (OES). The theme was Managing Risk in Earthquake Country. Contents are text searchable, indexed by author, title, and topic. The two CD-set includes: (1) Disks 1 and 2: Proceedings of the Eighth U.S. National Conference on Earthquake Engineering. Approximately 1,000 papers on the following topic areas: ground motion characteristics, hazard analysis, geotechnical engineering, building structures, bridge structures, lifeline systems, nonstructural components and contents, advanced technologies, new design criteria and methods, earthquake engineering practice, loss estimation, loss modeling and risk analysis, lessons from recent earthquakes, tsunamis, other seismic hazards, experimental methods, information technologies in earthquake engineering, impacts of earthquakes on business, response and recovery, social issues, public policy, and seismic awareness and education. April 2006. (2) Disk 2: Approximately 600 abstracts from the SSA Centennial Annual Meeting (3) Disk 2: Papers submitted to the OES 2006 Disaster Resistant California Conference (4) Conference Program (5) List of sponsors (6) List of exhibitors
