

Time Walkers

Time Walkers is not what it seems. You might think its a romance. You might think its about time travel. You might also think its magical realism. And you might be right. Sort of. Time Walkers is a carefully crafted, complex story filled with action, unexpected plot twists, and all of the above. It is 1950. Teens Lillian Grey and Marcus Bellanger, a bi-racial couple, search for privacy and a legendary hidden cave. They discover the Tairsi, a time-travel device that transforms their lives, and the lives of their three best friends. The five teens are descendants of a group of Travelers, stranded in Coalfire, Oregon over seventy years earlier. They possess the combined genetic makeup to activate the Tairsi, which has been concealed behind a rock wall in the cave since 1879. Instructed in its use by an omnipotent but powerless Guardian, the five face issues of personal accountability, collaboration, and destiny. The story moves forward fifty years to present day. Lillian, now in her seventies, is faced with a decision. Despite her personal misgivings, she chooses to mentor a new group of descendants in the use and responsibilities of the Tairsi.
