

Rates Of Chemical Reactions (High School Chemistry) (Volume 8)

This chemistry booklet was created to help students specifically with the topic of Rates of Chemical Reactions in chemistry. This booklet has been made extremely concise yet explains the concepts in detail at the same time. Remember, that this booklet is not designed to be your main study source, but rather, as an adjunct to your school teachers notes. There are also lots of practice questions with detailed solutions at the end to solidify the concepts you have learned.
